

Promethean ActivPanel V6

Promethean's industry-leading interactive flat panels transform the front-of-classroom experience by providing brilliant technology combined with next-generation lesson delivery software.

DESIGNED STRICTLY FOR EDUCATION

New!

Powered by Promethean Education Software Suite

Keep Your Curriculum

Deliver interactive, multimedia lessons offline or online using ActivInspire or ClassFlow Desktop, designed exclusively for use with Promethean Interactive Displays.

Access multi-user pen and touch-based learning activities and lessons.

Easily send interactive polls and assessments to student devices.

The World's First Upgradeable Android-Based Interactive Display

Powered by a revolutionary, upgradeable Android-based Mini PC, ActivPanel's unique design enables schools to upgrade the device's capabilities over time to keep pace with computing technology.

Access To Thousands Of Digital Teaching Tools

Connect to the vast, ever-expanding world of educational apps directly from your home screen.

Easily mirror mobile devices to share content, or connect Bluetooth devices such as musical keyboards, digital lab sensors, and robots to support your lessons.

The Industry's Most Elegant Writing Experience

Designed with the innovative In-Glass Technology, ActivPanel offers a naturally smooth writing experience with no script-lag or response delays. It features an instant whiteboard for free-form writing, converting to text, palm erasing, and saving your digitally captured notes.

Providing highly-accurate touch detection, ActivPanel's In-Glass technology creates a smooth pen-on-paper writing performance with no script-lag, enabling teachers and students to collaborate with ease.

It automatically detects differences between pen, touch, and palm erase, allowing teachers to teach efficiently without switching between software tools.

No Lamps to Change
No Projectors to Replace
